Amendment After Final Rejection

In The Claims:

- Sub. U
1. (Previously Amended) A combination multiple warning signal light and motorized vehicle, the combination multiple warning signal light and motor vehicle comprising:
- a) a plurality of strip light emitting diode light sources engaged to an exterior of said vehicle, each strip light emitting diode light source having a visible exterior surface;
 - b) a plurality of light emitting diodes arranged about and attached to the visible exterior surface of each strip light emitting diode light source; and
 - c) a controller in electric communication with the light emitting diodes, the controller constructed and arranged to selectively activate the light emitting diodes thereby producing at least two different types of visually distinct warning light signals, said controller being further constructed and arranged to produce the at least two different types of visually distinct warning light signals in at least one pattern of light signals, said light emitting diodes receiving power from a power source.
2. (Original) The combination of claim 1, the controller constructed and arranged to provide variable power intensity to the light emitting diodes.
3. (Previously Amended) The combination of claim 1, each of said strip light emitting diode light sources comprising a back side having an affixation member.
4. (Original) The combination of claim 3, wherein the controller independently controls the light emitting diodes on different strip light emitting diode light sources.
5. CANCELLED.
6. CANCELLED.
7. CANCELLED.
8. CANCELLED.
9. CANCELLED.
10. (Previously Amended) The combination of claim 4, wherein the plurality of light emitting diodes are in the form of an array.
11. (Previously Amended) The combination of claim 4, wherein the plurality of light emitting diodes are selectively illuminated to create the appearance of rotation.
12. CANCELLED.
13. CANCELLED.

14. (Previously Amended) The combination of claim 4, wherein the warning light signal is a directional indicator.

15. CANCELLED.

16. (Previously Amended) The combination of claim 4, wherein the motorized vehicle is a utility vehicle.

17. (Previously Amended) The combination of claim 4, wherein the motorized vehicle is an emergency vehicle.

18. (Previously Amended) The combination of claim 4, further comprising a cover enclosing said light emitting diodes.

19. CANCELLED.

20. CANCELLED.

21. CANCELLED.

22. (Previously Added) The combination of claim 1, said pattern of light signals comprising alternating illumination of at least two of said visually distinct warning light signals.

23. (Previously Added) The combination of claim 1, wherein said pattern of light signals is repeating.

24. (Previously Added) The combination of claim 1, said pattern of light signals comprising repeated illumination of one of said visually distinct warning light signals for at least two occurrences.

25. (Previously Added) The combination of claim 1, said pattern of light signals comprising repeated illumination of one of said visually distinct warning light signals for at least two occurrences and subsequent repeated illumination of another of said visually distinct warning light signals for at least two occurrences.

26. (Previously Added) The combination of claim 1, wherein said at least two different types of visually distinct warning light signals are illuminated in any combination to form said pattern.

27. (Previously Added) The combination of claim 1, wherein three or more visually distinct warning light signals are generated in any combination to form said pattern.

28. (Previously Added) The combination of claim 1, wherein three or more visually distinct warning light signals are generated alternatively in any combination to form said pattern.

29. (Previously Added) The combination of claim 1, wherein three or more visually distinct

Amendment After Final Rejection

warning light signals are generated in any combination of two or more visually distinct warning light signals to form said pattern.

30. (Previously Added) The combination of claim 1, wherein three or more visually distinct warning signals are generated alternatively in any combination of two or more visually distinct warning light signals to form said pattern.

31. (Previously Added) The combination of claim 1, wherein said at least two different types of visually distinct warning light signals are generated in a regular pattern.

32. (Previously Added) The combination of claim 1, wherein said at least two different types of visually distinct warning light signals are generated in an intermittent pattern.

33. (Previously Added) The combination of claim 1, wherein said at least two different types of visually distinct warning light signals are generated in an irregular pattern.

34. (Previously Added) A combination multiple warning signal light and motorized vehicle, the combination multiple warning signal light and motor vehicle comprising:

- BI cont.
- a) a plurality of strip light emitting diode light sources engaged to an exterior of said vehicle, each strip light emitting diode light source having a visible exterior surface;
 - b) a plurality of light emitting diodes arranged about and attached to the visible exterior surface of each strip light emitting diode light source; and
 - c) a controller in electric communication with the light emitting diodes, the controller constructed and arranged to selectively activate the light emitting diodes thereby producing at least two different types of visually distinct warning light signals, said controller being further constructed and arranged to produce the at least two different types of visually distinct warning light signals in at least one sequence of light signals, said light emitting diodes receiving power from a power source.

35. (Previously Added) The combination of claim 34, said sequence of light signals comprising alternating illumination of at least two of said visually distinct warning light signals.

36. (Previously Added) The combination of claim 34, wherein said sequence of light signals is repeating.

37. (Previously Added) The combination of claim 34, said sequence of light signals comprising random illumination of said light signals.

38. (Previously Added) The combination of claim 34, said sequence of light signals comprising

repeated illumination of one of said visually distinct warning light signals for at least two occurrences.

39. (Previously Added) The combination of claim 34, wherein said at least two different types of visually distinct warning light signals are illuminated in any combination to form said sequence.

40. (Previously Added) The combination of claim 34, wherein three or more visually distinct warning light signals are generated in a regular sequence.

41. (Previously Added) The combination of claim 34, wherein three or more visually distinct warning light signals are generated in an intermittent sequence.

42. (Previously Added) The combination of claim 34, wherein three or more visually distinct warning light signals are generated in an irregular sequence.
